NFRC AND ENERGY STAR® THERMAL DATA

*Quality First... Service Second to None
Since 1957*

The NFRC label provides the only reliable way to compare the energy efficiency, strength and durability of a window. The NFRC label appears on all fenestration products in the ENERGY STAR® program.

Compare U-Factor - The **LOWER** the U-Factor, the better it insulates, the **LOWER** your heating and cooling bills.

Compare Solar Heat Gain Coefficient - The **LOWER** the SHGC, the less solar heat your window transmits in summer, the **LOWER** your cooling costs.

Compare Visible Transmittance - Daylight and view are two of the fundamental attributes of a window. The **HIGHER** the VT the more **NATURAL LIGHT** is allowed into the home.

Compare Design Pressure - The **HIGHER** the DP Rating, the **STRONGER** and more **RESILIENT** the window will be to wind, rain and storms.

Look for ENERGY STAR® - ENERGY STAR qualified windows and doors **SAVE** energy, money and increase the comfort of your home.
